CHINESE MISSION CELEBRATES NEW NATION'S BIRTH

In celebration of the first New Year of the newly established republic of China, the members of the Literary Society of the Beretania Mission held a reception last evening in the Mission hall on Beretania street.

The large hall had been decorated for the occasion with colored streamers running from the center of the ceiling to the corners and the sides of the room. The color scheme brought in the shades used in the new flag of the Republic, and potted ferns, palms and shrubbery were banked in the corners. An interesting musical and literary program was rendered during the evening, several solos being sung by Miss Kemp, of the Kawaiahae Seminary, and several selections by the Lincoln Club quintet. There were also recitations by various members of the club.

The literary society is composed entirely of Chinese young men who are students at the mission and Mr. and Mrs. Elijah MacKenzie, the workers in charge are more than pleased with the rapid advances which have been made by the society.

DIVINER'S FINDS FAIL TO FLOW

Water has been located in some of the places designated by the Rev. H. Mason, the New Zealand water-finder, according to information given out by some of the men for whom he has been exercising his peculiar talent. One partial failure has been admitted, however. At the location selected by the clergyman on Lanai, where he said a flow would be struck at eighteen feet, the diggers have gone to a depth of thirty feet, finding little more than a heavy seepage thus far.

During the last week he has been engaged by the railway, going over some of the company's property in company with H. M. von Holt, of the railway's land department, and has indicated several points at which he says water will be found.

MANY TREES PLANTED ON AVENUE DEAD

The heat of the summer and fall was so intense that many of the cocoanut trees planted along Kalakaua Avenue by the Out-Door Circle did not thrive and this morning the prisoners were out on the avenue replacing the dead trees. There were a large number of the cocoanuts planted and if the weather is favorable they will probably do better than those formally planted.

The New HUDSON "37" Touring Car--5 Passenger Furnished Complete---No Extras to buy

Beware of the Car Made for Trading

Get a fair price for your old car. But don't demand anything unreasonable or you will pay for it in unsatisfactory quality and poor service in the new car

If you are trading your old automobile in on a new one, here is a caution you should observe.

There are cars toward the purchase of which a larger price will be allowed for your present automobile than you can obtain in buying a more desirable automobile.

It is better to decide upon which car you will prefer. Satisfy yourself that it is the best buy at a CASH price, and that it is the one you would choose if you were paying cash. Then if you are selling your old car, obtain the best bargain possible.

But do not accept merely for the sake of a change in cars, an

automobile that you do not consider advisable at a cash price.

HUDSONS are not made to trade.

HUDSON automobiles "second-hand" command a higher price proportionate to their original cost than those of any other make in the medium price class.

They are not sold to the dealer at a large discount, thus permitting him to make an extra allowance for old cars. No more profit on the HUDSON is allowed than that given on most automobiles at similar price.

The quality of the car is to be depended upon to make the sale, not the inducement of price. That

is why 48 engineers are regularly employed by the Hudson Motor Car Company in designing HUDSON automobiles.

The HUDSON shows what all these men working in unison know.

They gained their knowledge of motor car building in 37 well-known American and European factories. They had a hand in building more than 200,000 cars. No restrictions were put upon them in building the New HUDSONS. The highest quality was sought for and obtained. Price was not fixed.

Electric Self-Cranking---Electrically Lighted

THEY ARE COMPLETELY EQUIPPED.

They are electric self-cranking, are electric lighted and have every detail of equipment including speedometer, clock, demountable rims, rain vision windshield, tools, etc.

There are two models, HUDSON cars are furnished in two chassis—the "37," a four-cylinder, and the "54," a six.

The equipment is identical in other cars, consisting of an electric cranking device, electric lighting

generator and ignition system, known as the Delco Patent.

The equipment is complete in every respect including top, rain vision windshield, demountable rims, speedometer, clock, tools, etc.

The "37" has a 118-inch wheel base. The "54" has a 127-inch wheel base.

They are furnished in either Five-Passenger Touring Car, Torpedo or Roadster body. The "37" sells at \$1875—the "54" at \$2450, f. o. b. Detroit.

The "54" with Seven Passenger body is \$2900.
